### MAF Description

Ballard County Fiscal Court proposes to purchase and install four (4) 50kw generators in shelters/triage centers in three isolated communities

### Reason for Submittal

Each of these facilities has been identified as a shelter and/or a triage center. Currently, these facilities do not have emergency power. This project will meet that need.

### Problems Faced

With 296 square miles to cover in a disaster, many residents are isolated in their small communities. Heating and cooling shelters are needed during power outages and long term shelters are needed during disasters. A lack of power in these small communities presents a problem for residents.

### Solutions Proposed

The purchase of these four generators will allow for shelters and triage centers to operate, regardless of weather or power conditions.

## Project Funding
