#### **Course Description:**

This two-day course is designed to examine the role, design and functions of the Emergency Operations Center (EOC) and their relationships as components of a multi-agency coordination system. The course provides training about staffing and organization, information, systems, communications and equipment needs at the EOC, activating and deactivating the EOC, EOC operations and EOC testing, training and exercising. Participants will have the opportunity to apply what they have learned during group activities. This course will also focus on the coordination between Incident Command System (ICS) and decision making procedures taking place in the Emergency Operations Center (EOC). By looking at these two elements, local officials have the opportunity to develop an ICS/EOC action plan for their community's local emergency response personnel. An overview of both the ICS and the EOC are presented. **Class will begin at 8:30am on both days.**

#### **Course Prerequisites:**

IS-775 Emergency Operations Center (EOC) Management and Operations, ICS 100, ICS 200 (or Unified Command) are highly recommended prior to attending this course.

#### **Student Criteria:**

This course is designed for federal, state and local emergency management officials, first responders, incident command staff, private industry and volunteer agency personnel responsible for coordinating activities during a disaster or other major events.
