Wednesday - September 18, 2019
8:00am-12:00pm

Course Description:

This 4 hour specialized course is designed for PSAP (public safety answering point) centers who may receive calls for incidents involving hazardous materials. The goal of this instructional training is to prepare dispatchers to successfully handle these calls by giving them the ability to recognize and identify incidents involving hazardous materials, determine the necessary isolation of the area and glean as much information as possible from the caller. This will allow the dispatcher to communicate critical information to the emergency responders to ensure safe response and aid in continuity of the incident. This course is designed from the OSHA 29 CFR 1910 HAZWOPER standard and NFPA 1072 Awareness Level Personnel requirements.

Student Criteria:

This course is open to all Emergency Management, Rescue, Fire, Emergency Medical, and Law Enforcement personnel or any organization having responsibility for responding to a hazardous materials incident.

Special Notes:

Maximum of student seats available is twenty-four (24). You are considered accepted as a student in this class upon receipt of your application by this office so you will not receive a letter acknowledging that acceptance. Meals, lodging, and travel arrangements/expenses are the responsibility of the student and will *NOT* be reimbursed by KYEM unless otherwise noted.
